

## BATCHING SYSTEMS

We offer a variety of custom weight control systems for the food processing, and chemical processing industry to suit different client needs.

### Process Weighing Systems:

- Load cells
- Batch or continuous feed controllers
- Allen Bradley interfaces

### PLC Control Systems:

- Programming
- Operator interface programming
- Control panels
- Turn key systems

### Minor Ingredient Systems:

- Vibratory feeders
- Screw feeders
- Storage hoppers
- Onsite startup services

### Skid Loaded Systems:

- Custom designs
- Fabrication to order
- Complete wiring and testing before shipment

### Conveyor Scales:

- Motorized roller
- Belt conveyor
- Pails to pallets
- Vibration units available

### Bulk Bag Discharge:

- Fork lift of hoist loading
- Pneumatic flex plates
- Dust tight sealing

### Pail / Box Filling Systems:

- Tote loading
- Automatic filling and sequencing
- Vibratory feed or screw feed
- Custom designs to meet exact requirements

### Open Mouth Baggers:

- Auger feed or vibratory
- Bag clamp
- Portable unit available
- Adjustable to accommodate different size bags

### Automatic Blending:

- Snack food blending
- Loss in weigh continuous feed systems
- Tote support with surge bins
- Carbon steel painted or stainless steel construction

### Bulk Bag Filling:

- Lift and fill style
- Accumulating conveyors
- Vibration densification
- Easy to accommodate different size bags
- Load cell system for filling by weight

### Bulk Container Fillers:

- Fill bulk bag, tote, gaylord, or drums on one machine
- Blower for inflating bags with liners
- Vibration for densification
- Adjustable head to accommodate various containers
